## THE STORY OF THE 4<sup>TH</sup> OF JULY ...

In the days before the United States, the country was in a constant state of disarray. Trying and failing on the congruent decisions on what was best for the young country. On one side, you had individuals who wanted to stay under the Crown's authority because it is what they knew and trusted. On the other hand, another party of individuals wanted to form a new version of government in order to escape imperial control. The British found out about this move towards independence and because of this, the Crown felt threatened as the "New World" was their discovery... according to the Brits.

In response to this new revolt, the British decided to send over a military force to curb this movement towards independence. News of this show of force caught the ears of the Colonial people. Quickly, they banded together in an effort to drive out the "invaders". This action is what sparked the idea of the American Revolution (A.K.A. "The War of Independence"), a war that ended up spanning 7 years. Near the end of the war, the colonial delegates who formed the government and a meeting took place on July 2<sup>nd</sup>, 1776. At the meeting, it was agreed that the American Colonies would be independent from England and any other country who tried to lay claim to their land. Two days later, on July 4<sup>th</sup>, 1776, the Declaration of Independence was drafted. A document drafted by none other than Thomas Jefferson.

From that fateful day in 1776, festivities have ranged from parades, fireworks, and even concerts in an effort to celebrate that new-found freedom. Those festivities still continue to this day. Franklin D. Roosevelt decided along with other members of Congress in 1941, that the July the 4<sup>th</sup> would be nationally recognized as a federal holiday.

## FROM THE RECREATION DEPARTMENT

### MOVIE QUESTIONS AND ANSWERS

**1. Question:** Why do the movies sometimes stop on a menu screen or loop a preview/behind the scenes video?

**Answer:** Each DVD is configured according to a studio's unique specifications; no two DVDs are alike (even ones from the same series), so each has distinct formatting and programming. This means there is no "standard" setting we can use when we play a new movie or series. We learn as we go.

**2. Question:** Why do our TVs lose a movie channel?

**Answer:** The DVD players send their signal through a Coax device which is how it gets to your television. If that signal is interrupted or lost (say, by a loss or interruption of power) that device must be re-tuned, usually by someone from the physical plant, which may take a day or two.

**3. Question:** Why do our programs not start exactly at 1:30 and 6:00 PM?

**Answer:** We try to start on time whenever possible, but there are a few things that can interfere with this. The first is that on Mondays, Wednesdays, and Fridays, we clean each player in use. This is done to insure the best viewing possible and to reduce the chance of a malfunction later. The second reason is that we are dependent on staff to access the players. In the evenings and on weekends this can be difficult for a variety of reasons, but mostly due to the institutions current staff shortage. Please know that we, and staff try to hit those start times whenever possible.

We hope this helps answer some of the most frequent questions we have received since the program was moved in from minimum. As long as we are using DVD players, there are going to be issues that will interfere with viewing. We realize that it can be frustrating when things go wrong, but please understand that our goal is to address these issues as quickly and as effectively as possible to ensure that you all have the best viewing experience possible.

## **Health Information Exchanges (HIEs): Connecting the Dots in Healthcare**

Health information exchanges (HIEs) are important because they help healthcare providers, both inside and outside of our institutions, securely share important information about your health if you should need medical care.

### **What is a Health Information Exchange (HIE)?**

A Health Information Exchange (HIE) is like a digital bridge that connects different healthcare providers and systems.

### **How Do HIEs Work?**

**Sharing Data:** When you have a healthcare visit, your medical info is put into an electronic file. This file lives in your electronic health record (EHR) which keeps track of everything, from your allergies to your latest checkup.

- 1. Secure Access:** Only authorized healthcare providers can access this information; and your health history is safely stored.
- 2. Benefits:** HIEs help your healthcare providers avoid mistakes, like giving you a medicine you're allergic to. They also save time—no more faxing or calling for records!

### **Why Are HIEs Important?**

- 1. Quality Boost:** HIEs improve healthcare quality. Your healthcare providers see your full story, not just a chapter.
- 2. Efficiency:** Less paperwork means more time for patient care.
- 3. Other Benefit:** HIEs help to share your health info with the right people, like providers outside of the institution when you are released.

## Deep Thoughts with Cambell

On the mountains of truth, you can never climb in vain: either you will reach a point higher up today, or you will be training your powers so that you will be able to climb higher tomorrow.

- Friedrich Nietzsche

The only way to make sense out of change is to plunge into it, move with it, and join the dance.

- Alan Watts

If you don't know where you are going, any road will get you there.

- Lewis Carroll

I love those who can smile in trouble, who can gather strength from distress, and grow brave by reflection. 'Tis the business of little minds to shrink, but they whose heart is firm, and whose conscience approves their conduct, will pursue their principles unto death.

- Leonardo da Vinci

Out of suffering have emerged the strongest souls; the most massive characters are seared with scars.

- Khalil Gibran

When we long for life without difficulties, remind us that oaks grow strong in contrary winds and diamonds are made under pressure.

- Peter Marshall

Rudeness is a weak imitation of strength.

- Eric Hoffer

Heroism is endurance for one moment more.

- George F. Kennan
