HEALTH SERVICES

Opioid Use Disorder Medications

Health Services offers several forms of medications for Opioid Use Disorder with Brixadi being the most common. Brixadi and other treatments of Opioid Use Disorder reduce cravings and withdrawal of opioids. It is important to know, **Brixadi offers no protection against overdose**. Do not take other opioids, or drugs that are not prescribed to you, when taking Brixadi. Taking opioids or drugs while on Brixadi can increase the risk of opioid overdose, may worsen side effects, or even cause death. If you have questions about Brixadi or Opioid Use Disorder, please ask your medical provider.

KOP Medline Updates and Reminders

First, we would like to say thank you for your patience and understanding as we roll out the EHR system and work on getting all the kinks worked out.

As you may have noticed we are not doing callouts to notify you that you're in-cell medications are ready for you to pick up. Instead, we are now sending yellow cards to notify you. You still have the option to come to either the 6am line or the 11am line. You do not have to have your yellow card with you, although it is helpful if you do. You do have to have your ID with you.

As always you need to stop by the pill line on your way to chow. If you wait until after chow, you run the risk the line will have been called, and you may have to wait until the next line. We call the line when the last block has let everyone out for chow. The chow hall always calls to ensure everyone in line has had a chance to go to chow before they stop serving.

Just a reminder no food, drinks, or containers of any kind empty or full are allowed on the carts for any reason. So please just don't put anything on the cart.

Make sure you are turning in your kytes into the medical kytic box on the control floor with the big red cross. Make sure you are putting your stickers for the

medications you are needing or the name of the medication you need. We cannot order all your medication; you must tell us what you need. Medications can only be refilled about 5 to 7 days early from the last fill date. This means we cannot fill them any earlier. Keep an eye on the date your prescription expires so you give plenty of notice that the expiration is upcoming so we can try and make sure you don't have to wait to get the prescription renewed. Also, on the back of your pill pack or the box your medication came in is the date the medication expires, so look at that too. Especially on the medications you don't use daily.
